

## Press release

# TÜV NORD CERT certifies inter-divisional SPIE management system

**Essen (Germany), November 30, 2016** – *The implementation of an inter-divisional management system guarantees SPIE GmbH, a subsidiary of the independent European leader in multi-technical services in the areas of energy and communications, stable processes in the entire expanding corporate network. In the course of a matrix certification by TÜV NORD CERT the existing certifications to DIN EN ISO 9001, 14001 and 50001 as well as BS OHSAS 18001 have now been renewed and standardized for the new management system structure. This company-wide certification also applies to the subsidiaries of SPIE GmbH that were acquired and successfully integrated over the last few months.*

The standardization of all existing management systems in the five operational divisions, and all crossover processes and work tools within the SPIE GmbH corporate network, is part of the implementation of the ONE SPIE strategy. This approach is aimed at expanding existing technical competence, broadening the range of products and services along the value-added chain and increasing local presence. All SPIE customers should thus profit from its extended technical competencies.

*“The inter-divisional matrix certification by TÜV NORD CERT is a real milestone that provides confirmation that the processes are lived across acquisitions – and shows us where we can be even better,”* says Marc Kämper, management representative of the SPIE GmbH corporate network.

In summer 2016 the experts of TÜV NORD CERT audited SPIE locations yet again with regard to quality, health, occupational safety, environment and energy management. Beyond the optimization of internal processes, the audit also vis-à-vis SPIE customers documents the highest standards in the audited divisions.

## About SPIE GmbH

SPIE GmbH, a subsidiary of the SPIE group, the independent European leader in multi-technical services in the areas of energy and communications, is the service- and industry-defining multi-technology provider in Germany, other German-speaking countries and Central Europe. The range of services includes technical services for buildings, plants and infrastructures, from planning and construction, to operation and maintenance. SPIE GmbH's solutions sustainably reduce customers' operating costs, and their CO<sub>2</sub> emissions by a total of 160,000 tons annually.

With over 38,000 employees at almost 600 locations in 38 countries, the SPIE group generated a consolidated revenue of € 5.3 billion and a consolidated EBITA of € 351 million in 2015.

In its "Germany and Central Europe" segment, with 5,900 employees at over 70 locations, the SPIE Group generated a revenue of € 901 million in 2015.
